Internet surfing this medium is used to search the articles published on “Wild Vegetables and provide link for reference. Chapter is online references for “Wild Vegetables” based on online journal directory the DOAJ.

Definition

“Wild Vegetables”, vegetables that grow spontaneously in natural or semi natural ecosystem and survive independently of direct human action.

- “Vegetables that grow naturally without cultivation or care are called wild vegetables. These plants grow in forests, wilderness, edges of farmlands and barren fields.” (*Wild Vegetables In India | Edible Wild Plants | Edible Vegetables*, n.d.)

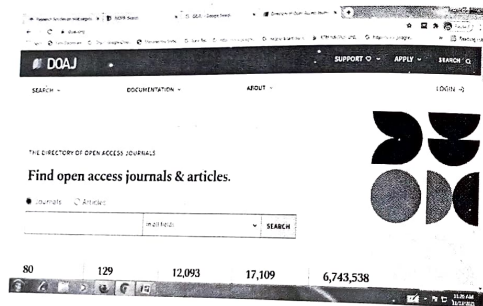

Some Important Characteristics of “Wild Vegetables”

- They are locally available and their use is based on traditional ecological knowledge
- They are a low-input, low-cost option for increasing nutrition and reducing the need to spend limited cash resources
- They provide greater benefits to vulnerable populations (poorer households, women, and children)
- They contribute to livelihoods and are available during times of drought or conflict-driven famine. (Shumsky et al., 2014)

Online Directory used to find out online articles on "Wild Vegetables for future research:

DOAJ: (Directory of Open Access Journal)

Directory of Open Access Journal (DOAJ) is Community Curated Online Directory that provide access to high quality, open access, peer reviewed journal and indexed journals.
